Guest Email Photo ID Upload Section

The screenshot displays the 'Complete your details' section of the Lumina Hotel & Residences Guest Welcome Guide platform. The interface is dark-themed with a top navigation bar showing the hotel name, a phone number (+1 555 123 4567), and a progress indicator with four steps: 1. PRE-ARRIVAL, 2. ALL SET, 3. CHECK-IN, and 4. YOUR GUIDE. A status bar indicates 'Admin preview — state: identity . This does not affect the live booking.' The main content area is titled 'LUMINA HOTEL & RESIDENCES Complete your details' and shows 'Step 3 of 3'. A modal window titled 'STEP 1 OF 4 Welcome to your check-in portal' is overlaid, displaying a welcome message to Jordan Taylor and a 'Next' button. The main form includes an 'Email address' field with the value 'you@example.com', a 'Skip tour' link, and a 'Submit my details' button. Below the email field, there are three security features: 'Encrypted', 'Check-in only', and 'Never shared'. A 'Back' button is also present. To the right, a 'Your booking' section shows the property name, check-in date (May 14, 2026), and check-out date (May 17, 2026). A note indicates 'Your guide unlocks on Thursday, May 14 — no action needed until then.' The footer contains the hotel name, a 'Need help?' link with the phone number, and a contact icon.

The screenshot displays the 'CHECK-IN DAY' section of the Lumina Hotel & Residences Guest Welcome Guide. The interface features a dark header with the hotel logo and a progress bar showing four steps: PRE-ARRIVAL, ALL SET, CHECK-IN (active), and YOUR GUIDE. A notification bar indicates an admin preview state of 'arrival'. The main content area has a dark background with the text 'You made it — welcome!' and a 'CHECK-IN DAY' button. A modal window titled 'STEP 1 OF 3 Welcome to check-in day!' provides instructions and a 'Next' button. Below this, the 'CHECK-IN DAY' section includes a 'Head to the property' instruction, a property address (123 Aura Way, San Diego, CA, 92101), and an 'Open in Maps' button. A large 'I'm at the property — verify me' button is prominently displayed, with a 'Need help finding us?' link below it. The footer contains the hotel name and a 'Need help?' link.

Dashboard Onboarding Checklist

The screenshot displays the 'Dashboard Onboarding Checklist' interface for a 'Site Admin'. The interface is divided into several sections:

- Header:** Includes a search bar for 'Search guests, properties.', a notification bell, and buttons for 'Add Guest' and 'Site Admin'.
- Left Sidebar:** Contains navigation links for 'Welcome Guide', 'Dashboard', 'Properties', 'Guests', 'Categories', 'Content', 'Team', 'Activity Logs', 'Admin Guide', 'Settings', and 'Security'. A 'Client-ready demo' box is also present.
- Main Content Area:**
 - Top Card:** Greeting 'Good afternoon, Site Admin.' with buttons for 'Add Guest Booking', 'Open Admin Guide', and 'Start Dashboard Tour'.
 - Summary Cards:** Five cards showing key metrics: Properties (1), Active guests (0), Pending IDs (0), Today's check-ins (1), and Today's check-outs (0).
 - Setup Checklist:** A progress bar at 100% with a list of completed tasks: 'Your guest portal is fully configured and ready.' and a grid of tasks marked 'Done' (Add your first property, Update brand and logo, Add contact details, Add default categories, Add first guest booking, Copy a guest URL, Test guest pre-check-in page, Review Admin Guide).
 - Needs attention:** A list of operational reminders: 'Missing photo ID' (0), 'Checking in today' (1), 'GPS approval needed' (1), 'Parking info missing' (1), and 'Checking out today' (0).
 - Today's check-ins:** A list of guests scheduled to arrive today, including 'Jordan Taylor' (Lumina Hotel & Residences) with a 'Pending' status.
 - Today's check-outs:** A section indicating 'No departures scheduled today.'
 - Recent guests:** A table showing the latest booking activity for 'Jordan Taylor' (LUMINA-DEMO) at 'Lumina Hotel & Residences' from 'May 14 - May 17' with a 'Pending' status.
 - Recent activity:** A log of recent actions, including 'Site Admin completed the admin onboarding tour.' and 'Guest Jordan Taylor viewed the portal'.

Setup checklist keeps first-time owners focused on launch-critical steps.

DESKTOP VIEW

2.4

Dashboard Recent Activity Section

The dashboard is titled "Dashboard" and features a sidebar with navigation links: Welcome Guide, Dashboard, Properties, Guests, Categories, Content, Team, Activity Logs, Admin Guide, Settings, and Security. A "Client-ready demo" button is also present in the sidebar.

The main dashboard area displays the date "THURSDAY, MAY 14, 2026" and a greeting "Good afternoon, Site Admin." with buttons for "Add Guest Booking", "Open Admin Guide", and "Start Dashboard Tour".

Key metrics are shown in a row of five cards:

- Properties: 1 (Total units configured)
- Active guests: 0 (In the arrival window)
- Pending IDs: 0 (Awaiting document upload)
- Today's check-ins: 1 (Arrivals today)
- Today's check-outs: 0 (Departures today)

The "Setup checklist" section shows a 100% completion rate with a progress bar. It lists several tasks, all marked as "Done":

- ✓ Your guest portal is fully configured and ready.
- Add your first property
- Update brand and logo
- Add contact details
- Add default categories
- Add first guest booking
- Copy a guest URL
- Test guest pre-check-in page
- Review Admin Guide

The "Needs attention" section lists operational reminders:

- Missing photo ID (0)
- Checking in today (1)
- GPS approval needed (1)
- Parking info missing (1)
- Checking out today (0)

Two sections show "Today's check-ins" and "Today's check-outs". The check-ins section lists a guest, Jordan Taylor, with a "Pending" status. The check-outs section shows "No departures scheduled today."

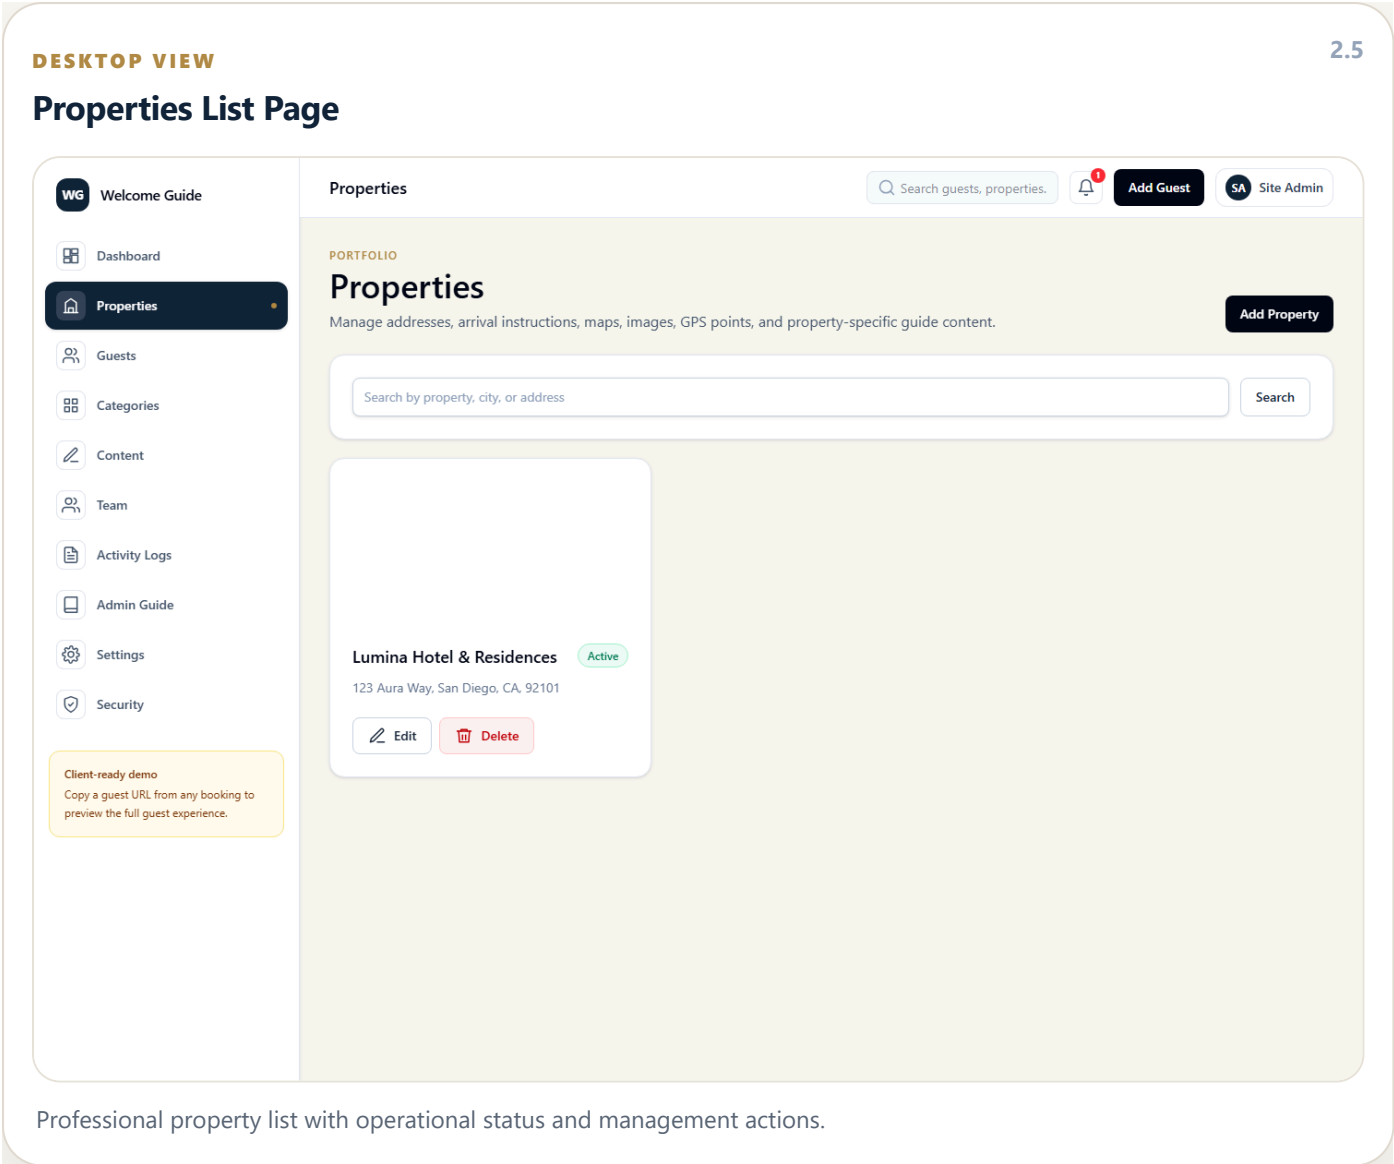

The "Recent guests" section displays a table of latest booking activity:

GUEST	PROPERTY	STAY	STATUS
Jordan Taylor LUMINA-DEMO	Lumina Hotel & Residences	May 14 – May 17	Pending

The "Recent activity" section shows a list of system events:

- Site Admin completed the admin onboarding tour. (18 seconds ago, success)
- Site Admin restarted the admin tour. (23 seconds ago, info)
- Site Admin logged in successfully. (26 seconds ago, info)
- Guest Jordan Taylor viewed the portal (state: identity). (39 seconds ago, info)
- Guest Jordan Taylor viewed the portal (state: identity). (58 seconds ago, info)
- Guest Jordan Taylor viewed the portal (state: arrival). (3 minutes ago, info)
- Guest Jordan Taylor viewed the portal (state: arrival). (4 minutes ago, info)
- Guest Jordan Taylor viewed the portal (state: arrival). (4 minutes ago, info)

Recent system activity gives owners a clear audit trail from the dashboard.

ACCOUNT CONTROLS

Profile and security

Review the signed-in admin account and the recommended security posture for production deployments.

Admin profile

This installation uses custom Laravel authentication. Profile editing can be extended later without changing guest functionality.

Name

Site Admin

Email

admin@example.com

Security checklist

Use HTTPS in production.

Change the seeded admin password before launch.

Restrict photo ID access to authenticated admins.

Keep APP_DEBUG=false on the VPS.

Add 2FA before onboarding multiple staff members.

2FA READINESS

Two-factor authentication

The UI is prepared for a security workflow, but two-factor authentication has not been enabled yet because this project is using lightweight custom auth instead of a full account-management starter kit. For production, add Laravel Fortify or Breeze profile features before giving access to multiple admins.

Security guidance, profile card, password/2FA readiness, and production notes.

Completed guest flow

New a guest moves from booking creation to checkout — step by step.

1 Admin creates booking

You add the guest in the Guests module. A secure URL is generated with a unique private token.

2 Admin shares URL with guest

Copy the guest URL, or the pre-built invitation message from the booking detail and send via email or message.

3 Guest submits pre-arrival

Guest opens the URL, enters their email, and uploads a photo ID before arrival day.

4 Check-in day arrives

On the check-in date, the GPS verification screen unlocks. Guest taps "Verify My Location".

5 GPS verification

If the guest's address is within the configured radius, check-in is approved instantly. Admin can manually approve if GPS fails.

6 Welcome guide unlocks

After check-in, the guest accesses the full property guide: WiFi, parking, restaurants, checkout, and more.

7 Checkout

On checkout day, the guide transitions to a checkout view with instructions and confirmation.

Team roles & permissions

What each role can and cannot do across the platform.

Owner / Super Admin

Full access to everything including users, settings, and all logs.

Manager

Can manage properties, guests, categories and view logs. Cannot manage users or settings.

Staff

Can view guests and update guest status. Limited access.

Viewer

Read-only access across the admin panel.

Manage Team

Add Member

Activity logs & audit trail

Every action is recorded. Use logs to audit admin activity, investigate security events, and track guest behavior.

View Activity Logs

GPS verification & manual override

Automatic GPS

The guest's browser requests location. If within the configured radius (default 150m), check-in is approved instantly with a success log.

Manual override

If GPS fails (browser blocked, VPN, low accuracy), open the guest booking and click Manual Check-In Override. This is logged as a security event with your name and IP.

GPS radius is configured in Settings. Default is 150 metres. Increase for properties in areas with poor GPS accuracy (dense cities, high-rise buildings).

Troubleshooting common issues

Guest says the link doesn't work

Verify the guest URL in the booking detail. Regenerate the token if needed — the old URL is invalidated and a new one is created. Check that the booking status is not checked_out.

GPS verification keeps failing

Confirm property GPS coordinates are set in the Properties module. Ask the guest to allow location access in their browser. Use manual override if time-sensitive.

Photo ID upload fails for guest

The must be PNG, JPEG, WEBP, or GIF under 2MB. Ask the guest to compress the image or try a different browser (Safari on iOS sometimes blocks uploads).

Guest can't see the welcome guide

The guide only unlocks after successful GPS verification or manual check-in approval. Check the booking status — it must be checked_in.

Team member can't access a section

Review their role in Team Management. Manager and Staff roles have restricted access. Only Owner accounts can access Users and Settings.

Activity log shows repeated failed logins

This may indicate a brute force attempt. Review the IP address in the log and consider blocking at your hosting firewall level.

Go-live checklist helps confirm the client is ready for production use.

SECTION 3

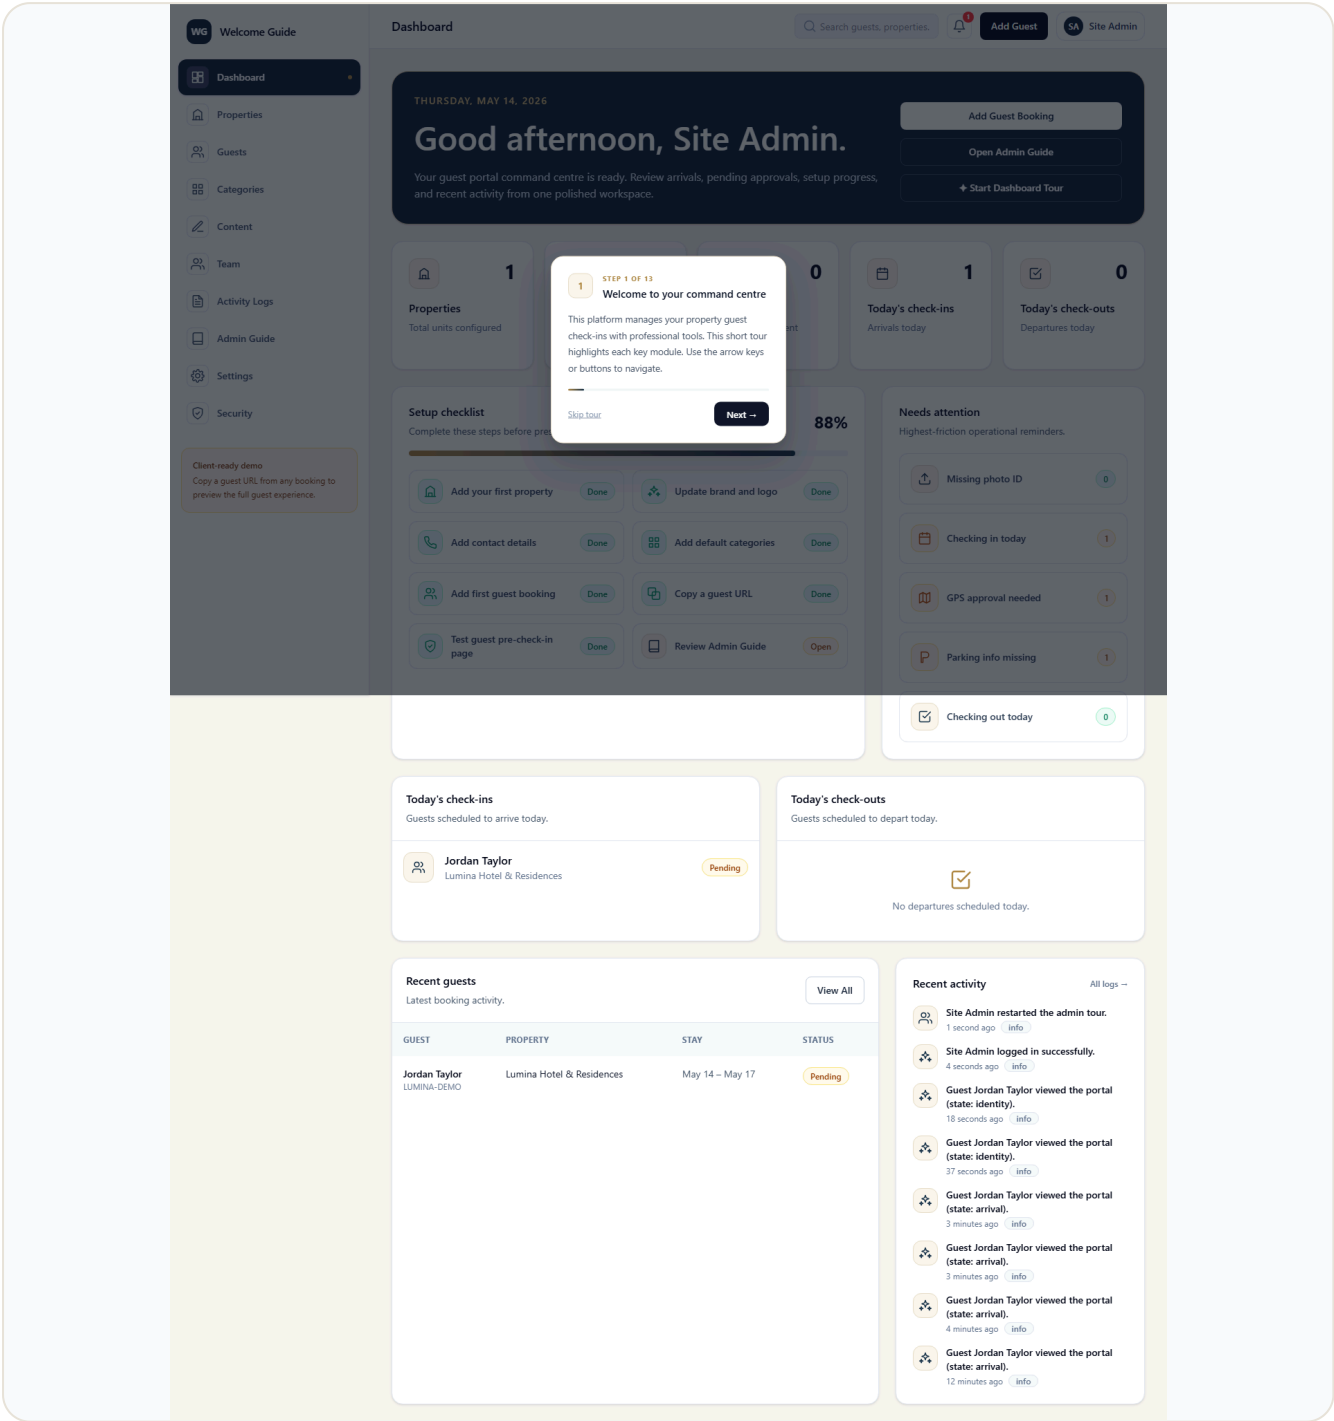

Admin Guide & Tour

Built-in guidance for non-technical operators, including the interactive onboarding tour and internal documentation.
